LLM: A paradigm shift in human history

03

About LLM

Various models have sprung up in recent years, such as GPT3, OPT3, Bloom, and ChatGPT. With hundreds of billions of parameters and huge training data, LLM is undergoing unprecedented changes in understanding human language.

Amazing Performance

The New York Times called it "the best AI chatbot ever released to the public." Microsoft Bing is planning to add ChatGPT to its search engine. There is even a technology company applying ChatGPT to the writing of legal contracts.

Commercial Value

The number of active users of ChatGPT in January 2023 exceeded 100 million; according to the Wall Street Journal, the valuation of openAI is \$29 billion; BuzzFeed used ChatGPT to write articles, and its stock price tripled in two days .

About Us

AI Revolution With LLMs

AI is poised to revolutionize the world through large language models, with applications in many areas.

Pioneering AI Technologies

Bauhinia AI specializes in researching and developing AI technologies, such as integrated large language models.

Unleashing the Benefits of AI

Our mission is to bring the benefits of AI to society, through applications such as non-character players in metaverse, chatbots, and digital humans.

Our Applications

Mental Health

Soul mate, psychological counselor, emotional monitoring, psychological counselor training assistant

Intelligent NPC

Virtual spokesperson, virtual idol, intelligent NPC creation tool, Metaverse concert

Finance

Intelligent customer service and revenue monitoring applied to the banking, insurance, and securities industries

Education

Essay revision, Homework assistant, language learning assistant

Finance

Chatbot for Finance

09

Personalized Service

Chatbot can judge the clients' investment type and clients' interest points through the dialogue with them, and provide personalized services accordingly

Income Monitoring

Chatbot can monitor investors' income in real time, and when necessary, Chatbot will notify customers to discuss a new investment portfolio

Customer Service

Chatbot can not only discuss current political and economic hotspots with customers, but also answer questions about specific enterprise by learning about it in advance

How does **Enterprise** benefit?

Enhance the Brand Image

In line with the positioning of enterprises technology products

7/24 Available

Customer service resources can be allocated reasonably, reducing costs and increasing efficiency

Improve User Favorability

Personalized services can be provided according to user interests, which can improve user favorability

Extensive Financial Knowledge

Extensive expertise enables chatbot to answer more financial-related questions.

How do we achieve the above?

Tech Overview

11

Analysis based on integrated LLMs

The chatbot has a high language understanding and expression ability based on its large model, and can adapt to various question-and-answer scenarios

By building a real-time database, the Chatbot can match the appropriate answer to customer questions based on their content, a capability that ChatGPT does not possess

Access to real-time data

Capability to Memorize

The model has the ability to remember previous conversations with the user and can answer their follow-up questions accordingly, which ChatGPT is unable to do

12

Team Adviser

Wang Yang

Mathematician; Vice President of the Hong Kong University of Science and Technology; Professor of the Department of Mathematics; Director of the Big Data BioIntelligence Laboratory of the Hong Kong University of Science and Technology; Deputy Director of the Institute of Big Data of the Hong Kong University of Science and Technology.

OUR TEAM

13

Karl

A senior data scientist and a veteran in Web3 and AI

Star

A skillful student in speech algorithms, digital human and deep learning

Long

An expert in Unity 3D, algorithms engineering and data science

Sanda

A computer scientist from a top university in China majoring in AI

OUR TEAM

14

Michael

A passionate algorithm engineer with a focus on NLP

Eric

An enthusiastic AI believer with rich experience in PR and BD

Ronald

A senior NLP experts with platform design and translation

Icey

An enthusiastic AI believer with rich experience in PR and BD

Shelton

An expert in computer vision and robotics

Cecilia

An investment advisor and business developer

Welcome future members

!

Thank you
